

# PEST SOLUTIONS

## TERMITE & PEST CONTROL

**TRAPPING METHOD:** The strategic placement of several traps to catch and remove rodents.

**RODENT PROOFING:** Closing of holes from the outside, breaking rodent entry points. This includes vents, holes in stucco, around pipes, garage doors and outside doors.

1st Week: Perform rodent inspection, set traps, give estimate on rodent proofing. Payment in full for trapping is required at this time. A 50% deposit is required on all proofing work to be performed by Pest Solutions. Balance is due upon completion of proofing.

2nd Week: Check all traps and remove trapped rodents. Rodent proofing will be performed at this time.

3rd Week: Check all traps and remove trapped rodents. Inspect rodent proofing.

4th Week: At this time you should not see or hear any rodents. If so please call the office to set up a rodent check.

Please call Pest Solutions and set your appointments each week of service 48 hours in advance. Our service technicians cannot schedule any appointments. It is very important that the office have communication with you for the next three weeks.

Rodent proofing is the key and must be done. Without closing the holes, we can never get a 100% control. We will let you know what holes or openings need to be closed. It is very important to have the proofing done by our second visit. We can do the proofing for an extra charge.

Pest Solutions will not use any rodenticides (rat or mice poison) on your property unless we have a signed agreement stating we are not responsible for adverse effects caused by rodenticides (I.E. dead rodents between walls, odor, flies, disease, etc.) and the danger they can be to children and pets. We strongly advise against the use of rodenticides in your home. The trapping method with rodent proofing is by far, the best method, in the long run it will save you money.

For customers wanting more than one trip per week, additional trips can be arranged at a cost of \$55.00 per visit. Customers wanting traps removed from the property at the end of the warranty must schedule an appointment before the warranty has expired. If the warranty has expired and you would like the traps removed. There will be a service charge of \$55.00.

Pest Solutions is not responsible for removing rodents that may have died from natural causes or rodenticides. In some situations we may have to call you with a quote.
